Image Availability Issue — EUFCC-CIR Experiment

The experiment uses the English dataset (`cir_db_translated_qwen_v5.csv`, 2,647 rows) with two partitions: test_id (2,559 queries) and test_ood (88 queries). Currently, images are loaded from two local folders: test_id/ and test_ood/.

Validation Results

Scope	Column	Total unique IDs	Found on disk	Missing	Coverage
Entire CSV (test_id + test_ood combined)					
All partitions	id1 (reference)	834	204	630	24.5%
All partitions	id2 (target)	1,144	462	682	40.4%
test_ood partition only (88 queries)					
test_ood	id1 (reference)	—	77	—	— (not validated separately)
test_ood	id2 (target)	325	325	0	100% ✓ complete
test_id partition only (2,559 queries)					
test_id	id1 (reference)	—	127	—	— (not validated separately)
test_id	id2 (target)	819	137	682	16.7% ✗ only 1 in 6 found

Dashes (—) mean the validate_images.py script counted combined totals only; per-partition unique id1 counts were not separately computed. The key numbers known from the CLIP terminal log are: test_id id2 = 137/819, test_ood id2 = 325/325, test_id id1 = 127 found, test_ood id1 = 77 found.

Impact on Experiment Results

The missing images create two distinct problems in the pipeline:

1. **Caption generation (Qwen VL):** The model was intended to receive the reference image (id1) alongside the query and metadata to generate a visual description of the target. With 75.5% of id1 images missing, most descriptions were likely generated without any visual input — reducing them to text-only outputs and weakening their descriptive quality.

2. **CLIP retrieval (test_id):** The candidate pool for test_id contains only 137 of 819 unique id2 targets (16.7%). Because the ground-truth target image is absent from the pool in most cases, the system cannot retrieve it regardless of description quality. The effective Recall@K ceiling for test_id is approximately 17%.

test_ood is unaffected — all 325 candidate images are present. This is why test_ood results (e.g. R@50 up to 83%) are strong while test_id results remain low (R@50 ~23%).

Missing id2 Images — Breakdown by Category

Category	Missing	% of 682
art_	168	24.6%
costume_	147	21.6%
tool_	104	15.2%
textile_	102	14.9%
ceramic_	68	10.0%
jewelry_	41	6.0%
furniture_	30	4.4%
numismatics_	7	1.0%
toy_	5	0.7%
archaeological_artifact_	5	0.7%
musical_instruments_	4	0.6%
bookbinding_	1	0.1%
